Easy Agile Programs is your complete PI Planning solution for Jira. Implement SAFe and empower teams and agile release trains to maintain alignment and achieve agility at scale.

Try it for free today!

you!

I'm a Release Train Engineer/PM and I am looking for a tool that will enable effective PI Planning without the need to leave Jira. It also needs to work for remote and distributed teams!

Well, hello there! 🙌

Here at Easy Agile, we have just the right solution for your problem!

us!

Empower teams to implement SAFe with a digital Program Board

Streamline visibility and provide transparency of your Program for all teams - without leaving Jira

Maintain 'scrum of scrums' or ART alignment at scale

Effectively conduct cross-team or PI Planning with remote, distributed or collocated teams

Automatic sync between Jira and Programs

Platinum Marketplace Partner

EASY AGILE PROGRAMS

Programs

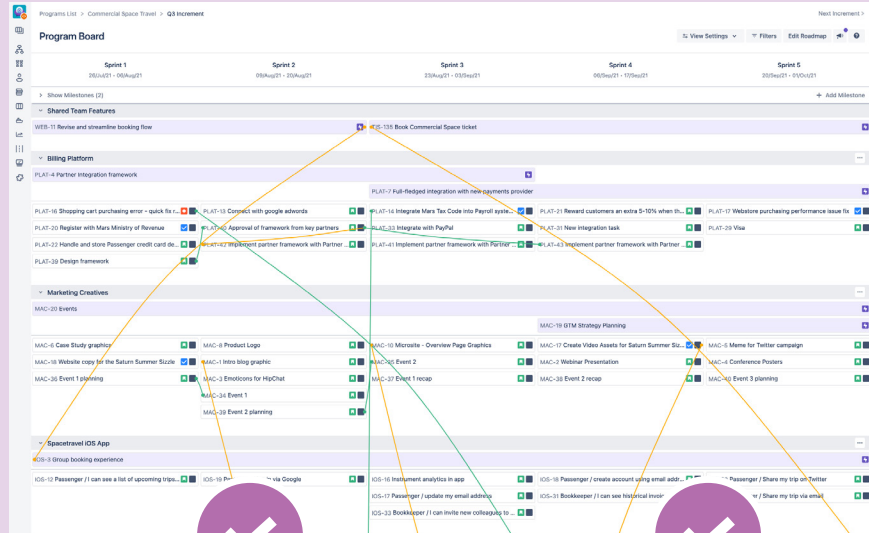

Key Features

- Digital SAFe Program Board
- Dedicated team planning board
- Team swimlanes
- Shared team features
- Visualised dependencies
- Milestones

Supports

- PI Planning
- Scrum of Scrums
- ART Syncs
- Sprint Planning

Bring the SAFe Program Board into Jira

Build your SAFe® Program Board right inside Jira during PI Planning - and keep it there - for team alignment during the PI. Easily visualise dependencies, deliverables and milestones at a 'team-of-teams' or ART level.

Focused Team Planning

Scrum & Kanban teams have a focused view of committed Features/Epics with a dedicated Team Planning Board. Create and visualise dependencies within a team or across teams and easily add sprint capacity. Schedule, create and estimate issues directly on the board.

Map dependencies for team and ART transparency

Filter the Program Board to highlight at risk, healthy or blocked dependencies for effective and focussed Scrum of Scrums and to maintain transparency across teams. Filter issues by status and team to gauge progress.

BEN PEARSON Senior Product Owner at PNI Media, on Easy Agile Programs

"Easy Agile Programs is a very easy tool to use. It was simple enough that a person could find out from the documentation how to set something up in 5-10 minutes, and then just use it."
