EASY AGILE USER STORY MAPS

CLOUD FORTIFIED

e
Story Maps

Focused Simple Story Mapping

Map your customer journey alongside your agile boards in Jira. Quickly and easily add new or existing stories inside the story map. Drag and drop them to prioritise by value to the customer.

Smooth Sprint and Version Planning

Visualise what the team will deliver and when by arranging stories into sprint or version swimlanes. View sprint/version statistics at a glance, ensuring capacity is filled, but prevent over commitment.

Easy Backlog Refinement

Drag items directly from your backlog onto your Story Map. Inline edit story summaries and story point estimates to ensure your backlog is updated, resulting in improved backlog quality.

JOHN WALPOLE Principal Technical Project Manager at Lyft, on Easy Agile User Story Maps

"With Easy Agile User Story Maps, the team can get back to doing the work they enjoy delivering, rather than doing admin, status reporting, or learning how to use a complex new tool."
